CANDIDATE SCREEN / LARKSPUR HEALTH (FICTIONAL EXAMPLE) / 2026-10-16

IT Manager

4 applications scored against 11 requirements (6 must-have). Fit and integrity are scored separately. A person makes every decision.

Applications	Advance	Consider	Pass	Integrity flags
4	**1**	**1**	**1**	**1**
median fit 52	score and must-haves clear	worth a closer look	below bar for this role	1 need identity checks first

Shortlist

Ranked by recommendation, then fit score. Learning agility is shown on its own because it predicts ramp-up on what they do not know yet.

#	CANDIDATE	FIT SCORE	MUST-HAVES	LEARNING AGILITY	RECOMMENDATION	INTEGRITY
1	**Priya Raman**	**95**	6/6	4	Advance	Clear
2	**Marcus Webb**	**65**	4/6 +1 partial	5	Consider	Clear
3	**Tyler Grant**	**16**	2/6 +4 partial	1	Verify first	High risk
4	**Linda Okafor**	**38**	2/6 +2 partial	2	Pass	Clear

Requirement coverage

Met means the skill shows up inside a dated role, not just a skills list.

	Help desk ownership must	macOS and Windows support must	Google Workspace and Slack admin must	Conference room AV must	IT vendors and hardware purchasing must	Onboarding and offboarding access must	Rippling / Okta / M365 admin	MDM	Regulated environment	Multi-office, fast growth	AI and automation
Priya Raman	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓
Marcus Webb	✓	✓	✓	◐	✕	✓	✓	✓	✓	◐	✓
Tyler Grant	✓	◐	✓	◐	◐	◐	✓	✕	✕	✓	✓
Linda Okafor	✓	◐	✕	✕	✓	◐	◐	◐	✓	◐	✕

✓ Met: done in a dated role ! Partial: listed, not shown in a role ✕ Not met

Candidates

Every score carries a rationale and quotes. A check mark means the quote was found in the application; a question mark means it was not.

#1

95

Priya Raman

First IT hire twice at growing multi-office companies; has already done this exact job, including SOC 2 and a Neat office build-out.

Advance | Integrity: Clear

Years (dated roles)	Median tenure	Quantified bullets	Must-haves met
12.2	**45 mo**	**11/18**	**6/6**

Profiles

Linkedin

SCORECARD

Must-have skills weight 30 medium confidence **5**/5

Every must-have is shown in the current role with a result attached: help desk, Mac and Windows, Google Workspace and Slack, Neat rooms, MSP and vendors, onboarding and offboarding.

- ✓ *"FreshService help desk, Slack triage channel"*
- ✓ *"Rolled out Kandji for 240 Macs and Intune for 30 Windows laptops"*
- ✓ *"11 conference rooms on Neat Bar and Neat Pad"*
- ✓ *"Manage the outsourced IT provider and 6 vendors"*

Relevant experience weight 25 medium confidence **5**/5

Built IT from scratch with no reports at a 40 to 260 person company across two offices, plus on-site lead for a 150-person office before that. Same scope and stage as this role, about 12 years total.

- ✓ *"Built IT from scratch with no reports"*
- ✓ *"Opened the Austin office and moved the NYC office"*

Demonstrated impact weight 15 medium confidence **5**/5

Several outcomes with baselines that line up with what this role wants: fewer repeat tickets, day-one readiness, fast offboarding, clean audits, SaaS savings.

- ✓ *"ticket volume per employee fell 38% in a year"*
- ✓ *"day-one readiness went from 70% to 98%"*
- ✓ *"Cut SaaS spend $94K a year"*

Learning agility weight 15 medium confidence **4**/5

Moved from law-firm desktop support to e-commerce IT lead to building a fintech IT function, picking up Kandji, Okta, and the Rippling API along the way. Recent learning is solid but not dramatic.

- ✓ *"Wrote a small Python script with the Rippling and Kandji APIs"*
- ✓ *"Jamf Certified Tech (2019)"*

Work-style signals weight 5 low confidence **4**/5

Writes for non-technical people, builds self-serve so users help themselves, and holds vendors to SLAs.

- ✓ *"Wrote plain-language how-to guides that became the firm's onboarding packet"*
- ✓ *"rewrote the MSP contract around response-time SLAs"*

Nice-to-haves weight 10 medium confidence **5**/5

Rippling, Okta, M365, Kandji, Jamf, Intune, FreshService, SOC 2, multi-office, and light automation are all shown.

- ✓ *"Rebuilt onboarding and offboarding around Rippling and Okta"*
- ✓ *"for SOC 2 Type II; two clean audits"*

STRENGTHS

- Has run this exact role: first IT hire, no reports, FreshService, Rippling, Neat rooms, MSP management
- Office openings and moves, which Larkspur needs for the new NYC office
- SOC 2 access reviews with clean audits; close to the HIPAA partnership work

GAPS AND RISKS

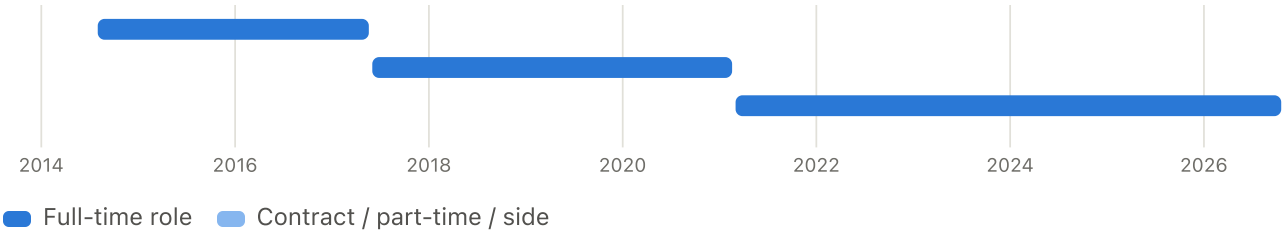

- No HIPAA specifically; SOC 2 and fintech compliance should transfer
- Current title is IT Manager at 260 people; check comp expectations against the $130K to $170K band

REQUIREMENTS

- Met MUST Help desk ownership scanner: demonstrated, last used current
- Met MUST macOS and Windows support scanner: demonstrated, last used current
- Met MUST Google Workspace and Slack admin scanner: demonstrated, last used current
- Met MUST Conference room AV scanner: demonstrated, last used current
- Met MUST IT vendors and hardware purchasing scanner: demonstrated, last used current

- Met MUST Onboarding and offboarding access scanner: demonstrated, last used current
- Met Rippling / Okta / M365 admin scanner: demonstrated, last used current
- Met MDM scanner: demonstrated, last used current
- Met Regulated environment scanner: demonstrated, last used current
- Met Multi-office, fast growth scanner: demonstrated, last used 2021
- Met AI and automation scanner: demonstrated, last used current

CAREER TIMELINE

INTEGRITY SIGNALS

No integrity signals found.

INTERVIEW QUESTIONS

1. Relevant experience Walk me through the NYC office move: what did you own, what did the MSP own, and what went wrong on cutover day?
2. Demonstrated impact Ticket volume per employee fell 38%. Which three changes drove most of that, and how did you know?
3. Learning agility Tell me about the last tool you had to learn from zero on the job. What did your first two weeks look like?
4. Work-style signals Tell me about a time an executive was frustrated with IT in the moment. What did you say and do?
5. Nice-to-haves You have SOC 2 but not HIPAA. What would you want to learn first from the Security Platform team?

#2

65

Marcus Webb

Solo IT lead at a 120-person digital health startup with the fastest learning curve in the stack, about 6 years in IT, light on vendor and purchasing work.

Consider | Integrity: Clear

Years (dated roles)	Median tenure	Quantified bullets	Must-haves met
8.4	**52 mo**	**8/10**	**4/6 +1 partial**

Profiles
[Linkedin]

SCORECARD

Must-have skills weight 30 medium confidence **3**/5

Help desk, Mac and Windows, Google Workspace and Slack, and onboarding are shown in the current role. Conference room AV is classroom AV from a prior job. Vendor management and hardware purchasing are not shown.

- ✓ *"Set up Jira Service Management as our help desk"*
- ✓ *"set up Rippling-triggered onboarding so accounts and laptops are ready on day one"*
- ✓ *"Supported 14 schools and 2,200 Chromebooks, Windows staff laptops, and classroom AV"*

Relevant experience weight 25 medium confidence **3**/5

Under two years as the go-to IT person at a company near Larkspur's stage, plus four years of school district support. About 6 years of IT against the 8+ asked. Single office as far as the resume says.

- ✓ *"IT Lead (solo IT), Fernway Health (digital health, 35 to 120 employees)"*

Demonstrated impact weight 15 medium confidence **4**/5

Specific, measured results in both roles.

- ✓ *"it now closes about 40% of requests without a ticket"*
- ✓ *"cut new-teacher account setup from 2 hours to 15 minutes"*
- ✓ *"security awareness training completion went from 61% to 100%"*

Learning agility weight 15 medium confidence **5**/5

Three clear cases of learning something new and shipping it fast: Jamf with no Mac background, Okta SSO across 34 apps, and an LLM help bot. Promoted within 14 months at the prior job, and

certifications keep pace with the work.

- ✓ *"learned Jamf Pro in my first month and enrolled all 110 Macs within 10 weeks"*
- ✓ *"Moved the company onto Okta SSO for 34 apps in 4 months"*
- ✓ *"Promoted from technician to specialist after 14 months"*

Work-style signals weight 5 low confidence **4**/5

Explains tech to non-technical people, tracks repeat issues, and automates repetitive work, which matches the posting's traits.

- ✓ *"I automate whatever I have to do twice"*
- ✓ *"a monthly report on repeat issues"*

Nice-to-haves weight 10 medium confidence **4**/5

Okta, Rippling, Jamf, HIPAA, and AI automation all shown. No FreshService or multi-office experience.

- ✓ *"Built a Slack bot with Google Apps Script and an LLM"*
- ✓ *"Supported the HIPAA risk assessment"*

STRENGTHS

- Best learning-agility evidence in the stack, with recent examples
- Already does solo IT in a HIPAA healthcare startup
- Uses AI and automation for exactly what the posting describes

GAPS AND RISKS

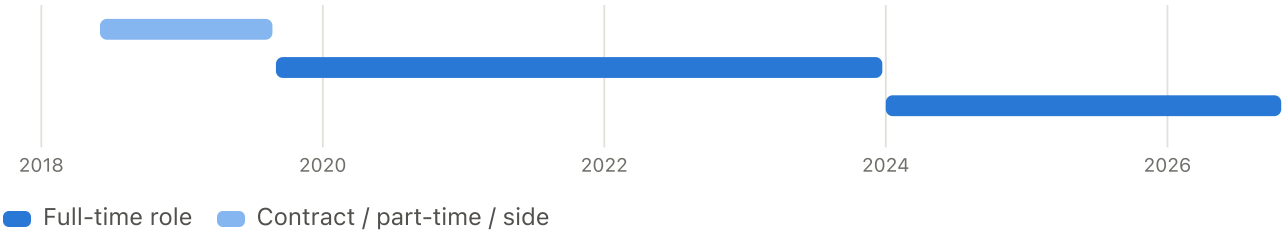

- No IT vendor management, MSP, or hardware purchasing shown
- Conference room tech is classroom AV, not Neat or Logitech rooms
- About 6 years against the 8+ asked; no office build-out experience

REQUIREMENTS

- Met MUST Help desk ownership scanner: demonstrated, last used current
- Met MUST macOS and Windows support scanner: demonstrated, last used current
- Met MUST Google Workspace and Slack admin scanner: demonstrated, last used current
- Partial MUST Conference room AV scanner: demonstrated, last used 2023 (reviewer call)
- Not met MUST IT vendors and hardware purchasing scanner: absent (reviewer call)
- Met MUST Onboarding and offboarding access scanner: demonstrated, last used current

- Met Rippling / Okta / M365 admin scanner: demonstrated, last used current
- Met MDM scanner: demonstrated, last used current
- Met Regulated environment scanner: demonstrated, last used current
- Partial Multi-office, fast growth scanner: listed (reviewer call)
- Met AI and automation scanner: demonstrated, last used current

CAREER TIMELINE

INTEGRITY SIGNALS

No integrity signals found.

INTERVIEW QUESTIONS

1. Must-have skills Who buys laptops at Fernway today, and what part of purchasing and vendor management have you owned yourself?
2. Must-have skills Have you set up or supported a dedicated video conferencing room system? Walk me through it.
3. Learning agility You learned Jamf in your first month with no Mac background. What did you do in week one, and what broke that taught you the most?
4. Work-style signals As the only IT person, how do you decide what to drop when five people need you at once?
5. Relevant experience How would your approach change going from one office of 120 to opening a new NYC office while LA and remote keep growing?

REVIEWER NOTES

Under the 8-year ask and missing vendor and purchasing work, but the learning curve and healthcare fit are strong. Worth a screen if the team can coach vendor management.

16

Tyler Grant

Matches every keyword, but the file hides three instructions to AI screeners, copies the posting, and claims tools before they existed.

Verify first | Integrity: High risk

Years (dated roles)	Median tenure	Quantified bullets	Must-haves met
14.8	60 mo	2/7	2/6 +4 partial

Profiles
Linkedin

Buzzwords: best-in-class, dynamic, fast-paced, orchestrated, passionate, results-driven, robust, spearheaded

SCORECARD

Must-have skills weight 30 medium confidence **2**/5

The must-haves appear mostly in bullets copied from this posting, which are not evidence. The one plain bullet on Mac and Windows support is generic.

- ✓ *"Keep the conference rooms working: Neat in New York, Logitech in Los Angeles"*
- ✓ *"Supported macOS and Windows hardware and software for 300 employees"*

Relevant experience weight 25 medium confidence **2**/5

IT Manager title, but no company size, office count, or scope is given for the current role, and the prior roles overlap by 19 months.

- ✓ *"IT Manager, Meridian Digital Partners LLC"*

Demonstrated impact weight 15 medium confidence **1**/5

No outcomes, only adjectives and duties.

- ✓ *"Spearheaded seamless, best-in-class SaaS administration"*

Learning agility weight 15 low confidence **1**/5

Nothing shows what was learned or when, and the dated tool claims cannot be true.

Work-style signals weight 5 low confidence **1**/5

Only adjectives. The hidden instructions also raise a candor question.

Nice-to-haves weight 10 medium confidence **2**/5

Names nearly every Extra Credit tool, but mostly in the skills list and hidden text.

STRENGTHS

- Names the right tools

GAPS AND RISKS

- No specifics anywhere
- Timeline and tool dates do not add up

REQUIREMENTS

Met MUST Help desk ownership scanner: demonstrated, last used current

Partial MUST macOS and Windows support scanner: demonstrated, last used 2020 (reviewer call)

Innocent read: Leftover template text or a keyword trick a resume site suggested.

Verify: Treat as a candor question; ask about it directly if they advance.

Moderate **42 eight-word runs copied from the posting** scanner

```
access the day someone leaves using rippling as | and remove access the day someone
leaves using | be the first stop for it help in
```

Innocent read: Mirroring the posting to get past keyword filters.

Verify: Probe the copied areas for real depth in the interview.

Moderate **Overlapping full-time roles** scanner

```
Senior IT Specialist, Coastline Tech Group | Jan 2012 – Dec 2016 <> IT Support
Analyst, Summit Data Services | Jun 2015 – Jan 2020 (19 months)
```

Innocent read: A transition, notice period, or unlabeled contract role.

Verify: Ask how the two roles overlapped.

! Moderate **Claims 12 years of rippling, which first shipped in 2016** scanner

```
12+ years administering Rippling
```

Innocent read: Counted a predecessor tool or a rough estimate.

Verify: Ask when they first used rippling and on what.

! Moderate **kandji listed under a role that ended in 2016; it first shipped in 2019**

scanner

```
– Deployed Kandji MDM across 500 Macs and managed Neat Bar conference rooms in 6
offices
```

Innocent read: The bullet describes later work, or a same-name older product.

Verify: Ask what they built with kandji in that role.

! Moderate **neat bar listed under a role that ended in 2016; it first shipped in 2020**

scanner

```
– Deployed Kandji MDM across 500 Macs and managed Neat Bar conference rooms in 6
offices
```

Innocent read: The bullet describes later work, or a same-name older product.

Verify: Ask what they built with neat bar in that role.

! Moderate **Copied bullets keep the posting's own wording** reviewer

```
Keep the conference rooms working: Neat in New York, Logitech in Los Angeles, with a
quick check every morning
```

Innocent read: Over-tailoring, possibly by a resume service.

Verify: Ask what the New York and Los Angeles offices were at Meridian and how the morning room checks worked.

– Weak **Unplaceable employers carry all the claims** reviewer

```
Meridian Digital Partners LLC; Coastline Tech Group
```

Innocent read: Small private companies often have little web presence.

Verify: Ask for each employer's website and a manager's name; check the state business registry and call a main line you look up yourself.

INTERVIEW QUESTIONS

1. Integrity Before any interview: live video ID check, and confirm identity documents and employers.
2. Integrity Your resume file contains hidden text addressed to an AI screener. Can you tell me about that?
3. Integrity You list Kandji and Neat Bar at Coastline Tech Group, which you left in 2016. Both came out later. Can you walk me through that role?
4. Integrity Coastline (2012 to 2016) and Summit Data Services (2015 to 2020) overlap by 19 months. Were both full-time?
5. Must-have skills Describe the last Neat room you set up: what broke, and how did you fix it?

REVIEWER NOTES

Scored only on visible content, as if the hidden instructions were not there. Three separate hidden-instruction techniques (white 1pt text, Word hidden property, invisible Unicode tag characters) make an innocent explanation unlikely.

#4

Linda Okafor

Health system end-user computing director with deep HIPAA and service desk experience, at a scale and level very different from this hands-on, no-reports role.

Pass | Integrity: Clear

Years (dated roles)	Median tenure	Quantified bullets	Must-haves met
17.3	54 mo	8/9	2/6 +2 partial

Profiles
Linkedin

SCORECARD

Must-have skills weight 30 medium confidence **2**/5

Strong on service desk, Windows, and vendors. Google Workspace, Slack, macOS, and conference room tech are not shown, and onboarding appears only as access certifications.

- ✓ *"Own ServiceNow ITSM for the EUC organization"*
- ✓ *"Negotiate and manage contracts with Dell, CDW, and two staffing vendors"*
- ✓ *"supporting 11,000 Windows endpoints"*

Relevant experience weight 25 medium confidence **2**/5

Sixteen years of real IT operations, but the current job is leading 14 people at a 9,000-person health system on a Microsoft enterprise stack. This role is hands-on with no reports at a startup on Google and Mac.

- ✓ *"Lead a team of 14 (service desk, desktop, and field services)"*
- ✓ *"Director, End-User Computing, Riverside Regional Health System (9,000 employees, 4 hospitals)"*

Demonstrated impact weight 15 medium confidence **4**/5

Clear, measured results at scale.

- ✓ *"brought first-call resolution from 58% to 74%"*
- ✓ *"Ran a $3.1M Windows 10 and Windows 11 refresh across 4 hospitals with zero clinical downtime"*

Learning agility weight 15 medium confidence **2**/5

Steady growth from analyst to director in one lane. Nothing on the resume shows picking up tools outside the Microsoft enterprise stack, which this role would need right away.

✓ *"Configured SCCM imaging for 2,000 devices"*

Work-style signals weight 5 low confidence **4**/5

Works across teams with security and builds knowledge bases others use.

✓ *"Partner with the CISO on HIPAA audits, access certifications, and phishing training"*

✓ *"Built the knowledge base in ServiceNow"*

Nice-to-haves weight 10 medium confidence **3**/5

Deep HIPAA, which matters here. Intune and M365 are listed in skills only. No Rippling, Okta, or fast-growth company experience.

✓ *"IT operations leader with 16 years in hospital and health system IT"*

STRENGTHS

- Deepest HIPAA and healthcare background in the stack
- Proven service desk metrics and large vendor contracts

GAPS AND RISKS

- No Google Workspace, Slack, macOS, or conference room experience shown
- Has managed teams for 12 years; this role has no reports and is fully hands-on
- Enterprise scale and stack, not a fast-growing small company

REQUIREMENTS

Met MUST Help desk ownership scanner: demonstrated, last used current

Partial MUST macOS and Windows support scanner: demonstrated, last used current (reviewer call)

Not met MUST Google Workspace and Slack admin scanner: absent

Not met MUST Conference room AV scanner: absent

Met MUST IT vendors and hardware purchasing scanner: demonstrated, last used current

Partial MUST Onboarding and offboarding access scanner: absent (reviewer call)

Partial Rippling / Okta / M365 admin scanner: listed

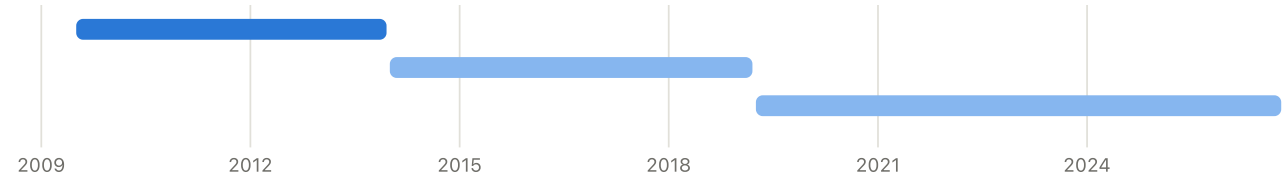

Partial MDM scanner: listed

Met Regulated environment scanner: demonstrated, last used current

Partial Multi-office, fast growth scanner: listed

Not met AI and automation scanner: absent

CAREER TIMELINE

INTEGRITY SIGNALS

No integrity signals found.

INTERVIEW QUESTIONS

1. Relevant experience This role has no team and you would be fixing the conference room screen yourself. What appeals to you about that, coming from a director role?
2. Must-have skills What hands-on experience do you have with Macs, Google Workspace, or Slack?
3. Learning agility Tell me about the last time you had to learn a tool well outside the Microsoft stack.

REVIEWER NOTES

Not a fit for this role as written. Strong candidate for a healthcare IT operations or service desk leadership opening.

Source file: linda-okafor.txt

How this was scored

FIT SCORE WEIGHTS

Must-have skills	30	Hands-on evidence for each must-have requirement.
Relevant experience	25	Depth, scope, seniority, and recency in comparable work.

INTEGRITY TIERS

- **High risk:** any strong signal (hidden AI instruction, contact details or resume text shared with another applicant, impossible dates, several overlapping full-time jobs) or 3+ moderate. Verify identity before any interview.
- **Verify:** any moderate signal or 3+ weak ones. Proceed, and check the specific item.

Demonstrated impact	15	Specific, checkable outcomes, not duties.
Learning agility	15	Picked up new tools, domains, or roles fast and applied them.
Work-style signals	5	Ownership, collaboration, communication. Weak evidence from paper; probe live.
Nice-to-haves	10	Preferred skills and domain extras.

Each dimension is scored 1 to 5 with anchors from the rubric, then weighted to 0-100. Advance at 75+ with no must-have missed; Consider at 60+ with at most one missed. A 4 or 5 with no verifiable quote counts as 3.

- **Clear:** nothing that needs a separate check.

No single signal proves fraud (FBI, Oct 2026). Signals are prompts to verify, never a reason to reject on their own.

NEVER SCORED

- Name, photo, age or graduation year, gender, race, national origin, citizenship (unless the role legally requires it), religion, disability, family status.
- School prestige, accent, location (beyond the posting's stated requirement), and non-US education.
- Employment gaps. They are shown as timeline facts only.

This is decision support, not an automated employment decision. If you hire for NYC roles or use it as the main screen, check Local Law 144 and EEOC guidance with counsel.

Research behind the rubric

- Sackett et al. 2022, revisiting meta-analytic validity of selection procedures (J. Applied Psychology)
- SIOP: is cognitive ability the best predictor of job performance?

- BPS Research Digest: recruiters think they can read personality from a resume; they can't
- Hartel et al. 2024: resume cues and applicant personality
- FBI IC3 PSA I-101326 (Oct 2026): North Korean IT worker indicators and mitigations
- FBI IC3 PSA I-012325 (Jan 2025): reused contacts, resume nomenclature, face-swap interviews
- HR Dive: Gartner, 1 in 4 candidate profiles could be fake by 2028
- Metaview: resume prompt injection
- SHRM: verify degrees, resume fraud
- Jackson Lewis: using AI to speed through candidates, legal risks

Generated by candidate-screen. Application content was treated as data; any instructions inside it were reported, not followed.
